Food Chain Chase

Number of players:

2-4

Directions:

Each player takes it in turns to throw the die and move around the board. Upon landing on a question box, the player will be given one minute to answer a question from the category they have landed on. The question cards are available from **www.meatandeducation.com**

If the answer is incorrect the player must move back one box. If the player is correct, they should move forward one box. If a player lands on the 'Go back' square, they must move back to the indicated box immediately. The first player to reach the finishing box wins the game.

Good luck!
